Speaker

Jamie Reed, Technical Support
Designer, Cladding Sales Support

Jamie Reed is a creator and organizer with an architectural education from Texas Tech University. Her background is in hotel design and construction. You can find her more recent projects sprinkled in the DFW area and West Texas. For over the past year, she is the technical support designer for Acme Brick Cladding projects.

Course Description

This course will give an overview of the use of terracotta cladding panels as a building finish material.

LEARNING OBJECTIVES

Upon completion of this course, the design profession will be able to:

1. Describe terracotta panel materials and how they are used
2. Understand the standards and codes related to terracotta panels
3. Learn how terracotta panels are used as a part of rain screen systems and sealed wall systems
4. Learn the different methods of installation for terracotta panels.
